I am horrified at the destruction which has already occurred to the Powerhouse Museum. It has gone from a world class museum to a "What am I?"

The destruction of the Wran Building will contribute to our historical buildings loss. We should be valuing and protecting our heritage.

If a design cannot incorporate the protection of the old along with modernization, then the designers are NOT equal to the task and need replacing.

The dismantling and destruction of the original Powerhouse Museum will be remembered as a disgrace to the Gov'ts involved.

The Wran building is part of OUR heritage, do not destroy it.
