Message

I object to the Powerhouse Ultimo Modification 1. The total demolition of the Wran building, and the further degradation of the functionality and design of the Powerhouse Museum revealed in Modification1, is a shameful betrayal of the public interest, a shocking waste of fit-for-purpose museum assets, the corruption of heritage conservation processes, and a breach of explicit promises by the NSW government that the Powerhouse Museum, and the Wran building in particular, would be saved. It defies credulity that the claimed necessity for Modification 1 was only discovered after the tender process was underway. The timeline for the preparation of Mod 1 suggests the complete demolition of the Wran building and the Powerhouse Museum was always the intention of the proponents.
